

SUPERLITE 25 CUBE

GENERAL FEATURES

CUBE 25 is a simple solution to create both simple and complex structures, made of SuperLite trusses. This product's main feature is its versatility. Cube 25 perfectly replaces any kind of 90° corner and cross, and of course, it often turns out to be much more functional than these items because of its shape that perfectly fits the space between trusses.

COUPLING SYSTEM

The coupling system between CUBE 25 and 25 section trusses belongs to SuperLite series with steel half joints and quick connection pins, which are easy to assemble and align.

EURO 29 CUBE
